

International Local Access Numbers

An up-to-date version is always available on <https://www.meetingone.com/support/international-access-phone-numbers/>

International local access numbers allow hosts and participants abroad to enter their audio conference from a local phone number. The meeting host will incur international local access dial in charges, while participants will incur costs imposed by their service plan for placing the call. Please see below for list of international local numbers available. If a participant's country is not listed, they may call a nearby country's access number; they would need to use the number listed in the far right column.

To enter a conference using a toll local access number:

Host: Dial the Toll local access number and enter *Room Number # when prompted. Enter * your host PIN # when prompted.

Participant: Dial the Toll local access number and enter *Room Number # when prompted.

(Note: If you are trying to access a dedicated toll free audio room, the toll free number acts as the conference room number in the above steps.)

Country	City	Local Access	International Dial
